# Look as good as you feel

## Slip Slop Slap

Protecting your skin from the harsh summer sun is crucial due to our intense UV radiation. Sunscreen is your first line of defense against skin damage, premature aging, and skin cancer.

Apply a broad-spectrum sunscreen with at least SPF 30 every two hours, and even more frequently if swimming or sweating.

Don't forget to cover often-missed areas like ears, neck, and feet.

Wearing protective clothing and seeking shade during peak UV hours (10 a.m. to 4 p.m.) further enhances your protection.

Prioritising sun safety helps maintain healthy, radiant skin for years to come.

Speak to our **Healthcare Heroes** on how to best stay protected this summer.
